University

ATHENS, OHIO

The Ohio University Center, is the social, cultural, and recreational center for all Ohio University students and faculty members. Erected in 1953 at a cost of \$1,500,000 the Center, located opposite the main campus, is primarily a place for fun and relaxation. Included among its many features for your comfort and convenience are three beautiful lounges, a ballroom capable of accommodating 800 couples, dining rooms, cafeteria, snack bar, library and record listening room, television facilities, conference rooms, student government and publications offices, and areas for bowling, table tennis, and other recreational activities. Club rooms for faculty members are also located in the Center which is always a place of welcome for students, parents, and friends of the university.

One of the finest structures of its kind, the Center is the culmination of a dream for students, faculty members, alumni, and friends. Whether its modern accommodations are used as a meeting place for friends, a place to drink a hot cup of coffee or eat a snack, as a quiet retreat or the setting for a torrid ping-pong match, the Center from its eight modern bowling alleys to its spacious ballroom, offers students all the free-time facilities that could be desired in any university.

OHIO UNIVERSITY BULLETIN

VOL. LIV

JANUARY, 1957

NUMBER 2

Published at Athens, Ohio, by Ohio University in January (twice), March, April, August, and November. Entered at the Post Office at Athens, Ohio, as Second-class Matter under act of August 24, 1912.

- The 1804 Lounge provides an ideal atmosphere for quiet, friendly visits.

- For those who enjoy the ultra-modern, the 1954 Lounge provides such a setting.

- Dancing and "coke-sessions" in the Frontier Room are enjoyed by many of the students during leisure hours.

- An atmosphere resembling the European sidewalk cafe is found during warm weather on the East Side Patio.

- Formal and informal dances, held at intervals throughout the year, are a part of the social life enjoyed by students. Here students dance in the spacious Center ballroom capable of accommodating 800 couples.

- Recreation rooms in the Center provide relaxation of another kind. Eight modern, sound-proof bowling alleys in an air-conditioned atmosphere are available to both students and faculty.

- Ping pong tests the skill and endurance of others in the large recreation room adjacent to the bowling alley.

- Intermission at a Saturday night dance gives students an opportunity to relax and drink a coke in the Bunch of Grapes Room

- Well-balanced meals planned by trained dietitians are served three times a day in the Center cafeteria located on the ground floor

- Historic Cutler Hall, the oldest building in the Northwest Territory erected for the purpose of higher education, maintains an air of a bygone age despite its modernization. Erected in 1816 and completely restored in 1947, it stands today as a symbol of the westward spread of education in the United States

Past, Present, Future . . .

In contrast to the early American architecture of Cutler Hall is the architect's drawing of the Physical Welfare Building which will house an olympic-size ice skating rink and indoor practice area when completed by the fall of 1957. The \$350,000 structure will be located adjacent to a new two million dollar Physical Education Building, now on the drawing boards. The first unit is designed to provide for ice skating several months of the year and as a practice area for various athletic teams and recreation groups during the remainder. With the completion of the building, Ohio University will be first in Ohio collegiate circles to offer their own facilities for indoor skating.

- The Natatorium is one of the largest and most modern of such structures on any college campus. It contains a pool 42 x 75 feet, with a rated capacity of 116 persons. Facilities of the Natatorium are available to students for credit as well as recreational swimming.

- A new wing is presently being added to the Engineering Building, above. Engineering laboratories, as well as facilities for classroom instruction, will be included in the new addition. Courses and practical experience in the various phases of engineering are offered in the engineering program.

- The lights of learning burn late in Edwin Watts Chubb Library. With its main collection of more than 250,000 volumes, the library is organized to provide books for study and research, and to promote an appreciation for reading as one of the cultural assets of later life.

- Copeland Hall, a new million-dollar structure, is the home of the College of Commerce. Opened in September, 1956, it houses business, journalism, and secretarial studies and is considered one of the most modern structures of its kind in the country.

- The Speech Building, located near the main campus, serves as headquarters for training in radio and television; debate and public address; the theatre; and speech and hearing therapy. The air-conditioned, main auditorium has a seating capacity of 300.

Individual Counseling

Your first year in college is, perhaps, the most important one. Many times it poses difficult problems for students. Recognizing these problems and the need for adjustment, Ohio University provides that a freshman spend his first year in the freshman or University College. Here you will pursue a varied, yet fundamental program, which will serve as a basis for later specialization. And during this first year, the Dean of the University College and a carefully-selected faculty counselor will give you any needed guidance or help. The counselor's job is to smooth the transition from high school to college and to see that you acquire a better understanding of the educational opportunities available. Counselors are selected from your major field of interest and are better able to assist you in choosing courses of study according to your aptitudes, interests and abilities.

- A faculty counselor who is primarily concerned with educational guidance is available to each student throughout his university career.

- Maurel Hunkins, Dean of Men, takes a genuine interest in the activities of all men students, and is always ready to discuss student problems

- The Coordinator of Veteran's affairs offers special service and help to the veterans enrolled at the university.

- Women students who are in need of friendly, helpful advice can always talk to Margaret M. Deppen, Dean of Women.

THE COLLEGE OF

Applied Science

The College of Applied Science offers professional training in the School of Engineering which leads to the Bachelor's degree in Architectural, Chemical, Civil, Electrical and Mechanical Engineering, including an Industrial option in Mechanical Engineering.

The School of Home Economics offers a curriculum leading to the degree Bachelor of Science in Home Economics. Students may major in five fields of study: clothing and textiles; family living and child development; food and nutrition; home economics education; and home furnishing, equipment and management.

The Department of Industrial Arts offers a curriculum leading to the degree Bachelor of Science in Industrial Technology as well as work leading to an Industrial Arts major in Education.

- Engineering majors get practical training in varied fields. Here students test specimens of concrete in materials testing laboratory.

- Future homemakers gain practical experience in different methods of cooking in the modern, well-equipped home economics kitchen.

- The values of home-making offered at Ohio University contribute greatly to those values which are helpful in home and family living.

- Engineering students work in electronics laboratory.

THE COLLEGE OF

Arts and Sciences

The College of Arts and Sciences offers programs leading to either the Bachelor of Arts or Bachelor of Science degree. The College is composed of 16 different departments which offer an opportunity for such a degree of specialization as will prepare students for positions in a wide variety of occupations after graduation. The departments include: botany, chemistry, classical languages, English, geography and geology, German and Russian, government, history, human relations, mathematics and astronomy, philosophy, physics, psychology, romance languages, sociology and zoology.

Preprofessional courses in dentistry, law, medical technology, medicine, nursing, optometry, pharmacy, physical therapy, theology, and veterinary medicine are offered in the College. A student may also prepare for a career in teaching while pursuing either degree in the College of Arts and Sciences.

- Astronomy students take a look into outer space through a giant telescope mounted atop the Engineering Building.

- Periodic field trips prove very valuable to students studying Botany and related fields.

- Students who pursue a course in liberal arts will find it a broad, well-rounded program.

- Zoology students work in laboratory.

- History students find maps very useful.

THE COLLEGE OF

Commerce

The College of Commerce offers many programs which have been designed to provide students with professional preparation for a career in business as well as a good liberal education. The College offers the following degrees: Bachelor of Science in Commerce; Bachelor of Science in Journalism; Bachelor of Science in Secretarial Studies; Bachelor of Science in Agriculture. Specialized departments within the College are: accounting, advertising, business law, economics, finance, management, marketing, secretarial studies, and statistics. The School of Journalism provides specialized training in advertising-management, feature and pictorial journalism, news writing and editing, public relations, and radio-TV journalism. The College of Commerce is housed in Copeland Hall, a new building with twenty-two general and special classrooms and thirty-five offices.

- Students learn to operate and maintain machinery and other equipment at the Ohio University farm located 10 miles west of Athens.

- Economic problems are discussed by Dr. Fred Picard with members of an economics class.

- Journalism students learn typography, printing and make-up fundamentals in typography lab

- Modern office equipment is a valuable aid in training for business and professional careers.

The degree, Bachelor of Science in Education, is awarded to students completing one of the four-year programs of general and professional study variously designed to prepare a student for a position as a teacher in an elementary school, a high school, or a college; a guidance director, a supervisor, or a school administrator; or one of several other kinds of professional positions in education. In conjunction with and in support of these programs, the College operates the University Elementary school, the Center for Educational Service, special clinics in guidance and reading, and numerous other special facilities.

- Student teachers participate in activities with children and study their behavior.

- Education majors practice teach in kindergarten and grades at the University Elementary School and in three elementary schools in Athens.

- A student teacher supervises an elementary reading class. Students also practice teach in Athens High School and other secondary schools in County.

The College of Fine Arts comprises three schools: Dramatic Art and Speech, Music, Painting and Allied Arts. After thorough and professional training, the graduates of these schools are awarded the Bachelor of Fine Arts degree. Within the School of Painting and Allied Arts are to be found numerous courses in architecture, art education, art history, design, painting and drawing, photography, sculpture and ceramics. The School of Music has a wide range of courses in applied music, music education, music history and literature, theory and composition, and music therapy. The School of Dramatic Art and Speech offers specialization in dramatic art, speech, speech correction, radio and television.

- A regular program of plays throughout the year helps to enrich the cultural life of the student body.

- "Live" models give art students valuable drawing experience in the studio. Students also work outdoors.

- Membership to the University Symphony Orchestra, with or without credit, is open to all qualified students.

- Students have an opportunity to test their skill and ability at layout designing in an advertising laboratory.

- Students majoring in photography receive training in all phases of color and black and white photography

- A study of plant tissue culture is one of the many special projects carried out by students in Botany

- Students write scripts, edit and broadcast news releases over WOU1. In the fall of 1957, station will broadcast as a standard 100-watt station on a 16 hour a day basis.

- Journalism students receive practical training in various phases of newspaper work at the Athens Messenger

Practical Experience in

A college education does not consist entirely of routine lectures and book assignments. Students at Ohio University supplement this knowledge with practical experience in laboratories and studios, and are helped toward a better understanding of the world in which they live. Like every other college and university, Ohio University strives toward one goal . . . the dissemination of learning. So it is that the practical aspects of a college education are gained by Ohio University students as they "learn by doing."

- Student Council members meet and discuss student activities to promote a balanced campus-wide social program.

- Medical Technology students learn the various laboratory methods used in hospitals and physicians' offices

- A structural system is made clear to students in architecture through the use of scaled models

Fields of Special Interest

For the student interested in journalism, there is practice on a local newspaper; dramatic and forensic organizations offer ample opportunities for acting as well as debate and oratory contests; extensive equipment enables laboratory classes to put theory into practice; home economics majors meet face-to-face with problems of housekeeping and home management in the Home Management House; and student publications provide opportunities for experience in writing, photography, business, and editorial management.

- The Ohio University Theatre offers students an opportunity to develop dramatic skills. Several productions are given each year. Tivonts are open to all students

- Technique and form in relation to time, space, and dynamics are all learned by students in modern dance

- Students who are interested in speech correction can perform clinical practice with children or adults

● The Ohio University Symphonic Band maintains a well-balanced instrumentation of selected musicians.

Fields of Special Interest

The many activities shown on the preceding and the following pages are but a few of the many fields of interest in which special training is offered at Ohio University. Although the completion of a college degree does not guarantee a good job, the university offers professional preparation for hundreds of careers which today demand training beyond the high school level.

● Engineering students have access to modern facilities. Here students study techniques of heat power laboratory.

● A chemistry lab

● A geology class

● A physics lab

- Welding is one of the many interests a student can pursue in Industrial Arts

- Classes in ceramics and sculpture give students an opportunity to test their creative ability

- A student in engineering drawing works toward a professional goal

- Ohio University offers ROTC programs leading to commissions in the Army and the Air Force

- Dr. Ernst von Dohnanyi, famed composer-pianist, is among the many artists to visit the campus.

Girls' Dormitories

Ohio University offers an attractive residence hall system for the health and well-being of its students. All of the women's dormitories are adjacent to the campus, easily and conveniently accessible to other university buildings and to the business section of the city of Athens. Each dormitory has its own dining facilities, with the exception of Voigt Hall which is served by a central dining hall. Management of the dining halls is under competent dietitians who serve as members of the staff of the Director of Residence Services. Each residence hall is under the supervision

of a residence manager or resident head. In addition, a number of graduate assistants and upperclass student counselors are assigned to the halls to aid in the overall counseling program.

Rooms are furnished with dresser, study desks, chairs, beds, and bed linen which is laundered by the University.

A well-organized social program is planned by each dormitory which includes dances, mixers, philanthropic undertakings, intramural athletic teams, study groups, and many other activities designed for the pleasure and benefit of the students.

- Voigt Hall, the newest women's dormitory, was named in honor of Irma E. Voigt, dean of women at Ohio University from 1913 to 1949.

- Bryan Hall, located directly across from the main campus, is also one of the university's newer dormitories for women students.

- Lindley Hall houses 110 girls. It has two beautiful lounges and a cafeteria where student residents eat their meals.

- Girls and their guests enjoy the beauty and comfort of the main living room in Voigt Hall.

- Lasting friendships develop between girls who share rooms or live in same house or dormitory.

- Ten social sororities have houses near the campus with residence and dining facilities.

- Scott Quadrangle consists of eight units and has accommodations for 425 students.

- The East Green dormitories are among the finest in the Midwest.

Men's Dormitories

All freshmen men are housed in new dormitories on East Green. The Georgian style, fire-proof buildings can accommodate more than 2100 students at the present time. Eight of the dormitories are currently in use and two more are expected to open in the fall of 1957. Upon completion of the \$7½ million program, East Green will contain eleven permanent residence halls and two cafeterias, with facilities for 3000 students. A young married couple serve as resident managers and preside over each dormitory, supervising activities and lending helpful advice.

- Students find rooms in dormitories bright and comfortable with ample storage and closet space.

- Seventeen social fraternities maintain houses near the campus. Members organize own social program.

• *Reed Hall, built in 1901, was the first of the new dormitories.*

• *Johnson Hall, built in 1951, was the last of the new dormitories.*

• *Reed Hall, built in 1901, was the first of the new dormitories.*

• *Johnson Hall was the last of the new dormitories, opened in 1951.*

- Work at the circulation desk at Edwin Watts Chubb Library is one of the many part-time jobs available to students

Earn While You Learn . . .

Ohio University offers many part-time employment opportunities to students whose finances are limited. Nearly one-half of the students "earn while they learn." Employment is available on campus and off-campus and falls into three general categories: Board jobs in university dining halls; part-time employment in local business establishments; and part-time work as student assistants in university departments and offices.

- Serving as student receptionists in girls' dormitories provides part-time employment for many girls.

- Many students at the university augment their finances by performing various jobs in the dining halls.

- The Health Center is fireproof and modern in every respect. The 3-story structure also contains an auditorium capable of accommodating 120 persons and is used as a lecture room during the academic year.

Healthful Living

Student health is of great concern at Ohio University. Like every other college and university, Ohio University recognizes its responsibilities to the academic community. The health of its students, therefore, is safeguarded at the Student Health Center located near the main campus. There, students who are ill receive excellent and constant care by a well-trained staff of doctors and nurses under the supervision of the Health Center Director.

The Health Center has a clinic with X-ray and minor surgery, a 10-bed infirmary with an isolation wing, and a physiotherapy ward. A health fee is included in the comprehensive registration fee, and entitles the student to such services as the clinic, the infirmary, emergency services, consultations, diagnosis and medicines.

● Doctor checks heart beat

● Nurses administer shots.

● A student uses therapeutic bath.

- President Baker sits with delegates from 17 other countries around a meeting room table in the Palais de Nations in Geneva, Switzerland.

Learning by Understanding . . .

FRIENDLINESS . . . the keynote at Ohio University, is evidenced at all times by President John C. Baker who has guided the University for the past 12 years. Sympathetic and understanding of the problems of youth and humanity, he is never too busy to voice a friendly "hello" or to sit down and discuss student and faculty problems. And this friendliness and understanding is not contained at Ohio University. For the past three years, as an appointee of President Eisenhower, Dr. Baker has served as the U.S. Representative to the United Nations Economic and Social Council, where his casual air of informality has been lauded by colleagues from both at home and abroad.

- Students from the United States as well as those from foreign lands frequently visit President Baker's home.

- President Baker congratulates several scholarship winners at the annual Honors Day Convocation.

- Twenty-three churches in Athens and fifteen student organizations on campus serve the spiritual needs of university students.

- "I will lift up mine eyes unto the hills, from whence cometh my help"

- Construction is underway on Helen Mauck Galbreath Memorial Chapel presented by John W. Galbreath, alumnus and trustee.

Although non-sectarian, Ohio University believes that learning and understanding come not only from daily contact with other students, faculty members and those who hold strong convictions and ideals, but from the study and observance of the spiritual side of life.

To foster this way of life, John W. Galbreath, an alumnus and trustee, recently donated \$246,000 to Ohio University for the construction of an interdenominational chapel, to be known as the Helen Mauck Galbreath Memorial Chapel. It is designed to seat 150 persons and should be completed by January, 1958.

Learning by Enjoying . . .

Students attending Ohio University have a good time. Whether it is participating in organized sports, attending social functions, swimming, dancing, or chatting over a coke at the University Center, the students enjoy themselves.

Although studying comes first, every student finds time for pleasant companionship with other men and women. And only through participation in these extra-curricular activities can students begin to see the importance of this part of the educational program.

In spite of its increased enrollment, Ohio University maintains its human qualities. Its focus is still on the individual student. And in a very real and vital sense, the university is "a home away from home" for freshmen and upperclassmen alike. It is a warm and friendly place filled with friendly classmates, familiar lecture halls, and opportunities for wholesome fun and recreation for everyone.

● The opening game

● Football provides many Saturday afternoon thrills.

● Girls participate in many exciting sports activities.

● Students travel to Lake Hope for swimming and picnics.

● The baseball team always ranks high in conference play.

● Students enjoy ice skating at Athens State Hospital

● OU's matmen vie with conference foes at home and away.

● Instructor demonstrates for students in fencing class

● Tennis is a popular sport for many of the students.

● OU "Bobcats" provide exciting thrills in Men's Gym

● Homecoming means floats, football, dances and friends.

● Natatorium is scene of strong conference swimming meet

● New freshmen get acquainted with OU

● Golfers have been consistent leaders in the conference.

● Memorial Auditorium was filled for Fred Waring show.

● The Marching Band performs in Ohio Stadium during half-time of home football games

● Students enjoy a "Concert Under the Elms".

● Military Ball is presented annually by ROTC.

● Leisure hours are spent doing things you like to do.

● Caroling is a time honored tradition on the campus

● OU trackmen lead the field in a highly-competitive meet.

and the fraternities serenade at various times.

- Students desiring positions in the educational field discuss job opportunities in Ohio and other states.

- Prospective employers from business and industry visit the campus and hold private interviews with students.

The Placement Bureau

Ohio University helps its graduates find suitable employment in the business, industrial, and educational fields through the Bureau of Appointments. Directed by Professor Albert C. Gubitz, it is divided into two areas: the Business and Industrial Division and the Educational Division. The former helps graduates find positions in such fields as accounting, engineering, business administration, chemistry, sales, and liberal arts. The Educational Division assists graduates in finding positions as teachers and administrators in the public and private schools of Ohio and other states.

The Graduate College

The Graduate College confers the Master of Arts, Master of Education, Master of Science, Master of Fine Arts and Master of Business Administration degrees. Students may also pursue courses leading to the Ph. D. degree in chemistry.

A number of graduate assistantships and research fellowships are available in the Graduate College of Ohio University. Applications for admission and a graduate assistantship or a research fellowship are filed with Dr. D. R. Clippinger, dean of the Graduate College.

The Branches

Ohio University since 1946 has operated branch colleges in Chillicothe, Portsmouth, and Zanesville, and in the Fall of 1956 opened branches in Lancaster and Ironton. Directed by Dean Albert C. Gubitz, the branches have a current enrollment of 1500. More than 8000 students have successfully completed work in the branches since their existence.

Work is offered at the freshman and sophomore levels, and the majority of courses are in the fields of liberal arts, education, and commerce. Courses offered in the branches are like those given on the main campus, with students receiving full residence credit. The Cadet Teacher program is featured in each branch whereby it is possible for students to complete all requirements for the Cadet Teaching diploma. Each year 20 scholarships, ten freshmen and ten sophomore, are made available in each branch college.

What it costs to attend Ohio University . . .

Ohio University, since it is a state, tax-supported university, receives much of its maintenance and operation expenses through legislative appropriations. No tuition or matriculation fee is charged, and the registration fee for each semester is considerably lower than that of most institutions of as high standard. General living costs in Athens, too, are quite moderate. As a result, it is possible for the average student to spend as little as \$850-\$900 for two semesters (one year) at the university.

An estimate of expenses for one eighteen-week semester, or one-half year at Ohio University is:

Comprehensive registration fee	\$110.00
Rent of room in dormitory (average rental)	90.00
Board in dormitory	198.00
	<hr/>
	\$398.00

(Registration fee for out-of-state students \$235.00)

The comprehensive fee includes the general registration fee of \$75.00, the student activity fee, student service fees such as health, library, and testing, and course and laboratory fees. Excludes fees for private instruction, as in music.

The above estimate does not include books or personal incidentals which vary with the individual student and the courses pursued. Through the Student Financial Aids Office, part-time employment is available to deserving students. More than 200 scholarships are available to superior students who are in need of financial assistance.

Applications and correspondence of all freshmen and undergraduate transfer students should be addressed to the Director of Admissions, Ohio University, Athens, Ohio. If you are interested in additional information, clip the attached coupon and send it at once. All information requested will be forwarded promptly.
